1

9.

10.

WHAT IS CLAIMED IS:

1	1.	An isolated nucleic acid of any one of (a) to (d) below:
2	(a)	a nucleic acid encoding a protein comprising the amino acid sequence of any
3	one of SEQ II	D NOs:2, 4 or 17,
4	(b)	a nucleic acid comprising a coding region in the nucleotide sequence of any
5	one of SEQ II	D NOs:1, 3 or 16,
6	(c)	a nucleic acid encoding a protein that comprises the amino acid sequence
7	of any one of	SEQ ID NOs:2, 4 or 17, in which one or more amino acids are replaced,
8	deleted, insert	ted and/or added and that is functionally equivalent to the protein comprising
9	the amino acid	d sequence of any one of SEQ ID NOs:2, 4 or 17, and
10	(d)	a nucleic acid that hybridizes under stringent conditions with the nucleic acid
11	comprising the nucleotide sequence of any one of SEQ ID NOs:1, 3 or 16, and that encodes a	
12	protein function	onally equivalent to the protein comprising the amino acid sequence of any one
13	of SEQ ID NO	Os:2, 4 or 17.
1	2.	An ignlated mysleig soid anguling the suring soid account of
2		An isolated nucleic acid encoding the amino acid sequence of any one of
2	SEQ ID NOs:2, 4 or 17 or a fragment thereof.	
1	3.	A vector into which the nucleic acid of claim 1 is inserted.
	4	
1	4.	A vector into which the nucleic acid of claim 2 is inserted.
1	5.	A transformant harboring the nucleic acid of claim 1.
1	6.	A transformant harboring the nucleic acid of claim 2.
1	7.	A transformant harboring the vector of claim 3.
1	8.	A transformant harboring the vector of claim 4.

A substantially purified polypeptide encoded by the nucleic acid of claim 1.

A substantially purified polypeptide encoded by the nucleic acid of claim 2.

- 11. A method for producing a polypeptide, the method comprising the steps of culturing the transformant of claim 5 and recovering a polypeptide expressed from the transformant or the culture supernatant thereof.
- 12. A method for producing a polypeptide, the method comprising the steps of culturing the transformant of claim 6 and recovering a polypeptide expressed from the transformant or the culture supernatant thereof.
- 13. A method for screening for a compound that binds to a polypeptide, the method comprising the steps of:
- (a) contacting a test sample with the polypeptide of claim 9 or a partial peptide thereof,
- (b) detecting a binding activity of the test sample to the polypeptide or the partial peptide thereof, and
- (c) selecting a compound comprising the binding activity to the polypeptide or the partial peptide thereof.
- 14. A method for screening for a compound that binds to a polypeptide, the method comprising the steps of:
- (a) contacting a test sample with the polypeptide of claim 10 or a partial peptide thereof,
- (b) detecting a binding activity of the test sample to the polypeptide or the partial peptide thereof, and
- (c) selecting a compound comprising the binding activity to the polypeptide or the partial peptide thereof.
 - 15. An antibody against the polypeptide of claim 9.
 - 16. An antibody against the polypeptide of claim 10.
- 17. A method of detecting a hemopoietin receptor protein in a test sample, comprising the steps of: contacting a test sample with the antibody of claim 15; and detecting

- the presence of an immune complex between the antibody and a hemopoietin receptor protein in the test sample.
 - 18. A method of detecting a hemopoietin receptor protein in a test sample, comprising the steps of: contacting a test sample with the antibody of claim 16; and detecting the presence of an immune complex between the antibody and a hemopoietin receptor protein in the test sample.
 - 19. A polynucleotide that hybridizes with the nucleic acid comprising the nucleotide sequence of any one of SEQ ID NOs:1, 3 or 16 or the complementary strand thereof and that comprises at least 15 nucleotides.
